Liftera-A

Body Lab Bali is proud to introduce you to our latest NON-SURGICAL Face-Lift treatment:
Liftera HiFU.

Liftera HiFU uses ultrasound energy which causes the tissue at the **SMAS** layer to heat up rapidly. Once the cells in the targeted area reach a certain temperature, they experience cellular damage which stimulates these cells to produce even more collagen and elastin.

This fresh production of new collagen and elastin helps improve the texture of your skin, making it firmer, tighter and stronger as well as giving the face a natural lifting, youthful effect, diminishing expression lines and wrinkles.
